EXAMINER'S AMENDMENT

1. An Examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE CLAIMS:

A) Please cancel claim 16.

B) Please amend (add) claims 11, 15, and 31 as follows:

11. (Currently Amended) A method of processing a bitstream representing a compressed image frame sequence, said method comprising:

receiving, for each of multiple frames, information identifying a subset of image slices for the frame, the subsets being independently encoded from other image slices not in the subsets such that any motion vectors necessarily point to an identified subset of another frame,

and wherein receiving information includes distinguishing the subset from a variable number of other image slices not associated with the subset and the information includes for each frame a map identifying each independently encoded subset for the frame, and the relative position of image slices in each subset with respect to other slices in the frame;

decoding the subsets;

selectively editing decoded data;

encoding new image slices from decoded data and edited data; and

inserting the new image slices into the bitstream, and generating a representative output signal.

Art Unit: 2613

15. (Currently Amended) A method according to claim 11, wherein the information identifies image slices associated with an object that varies in frame position across the multiple frames ~~and wherein receiving information includes distinguishing the subset from a variable number of other image slices not associated with the subset.~~

31. (New) A method of processing a bitstream representing a compressed image frame sequence, said method comprising:

receiving, for each of multiple frames, information identifying a subset of image slices for the frame, the subsets being independently encoded from other image slices not in the subsets such that any motion vectors necessarily point to an identified subset of another frame;

decoding the subsets;

selectively editing decoded data;

encoding new image slices from decoded data and edited data;

inserting the new image slices into the bitstream, and generating a representative output signal;

adjusting a bitstream parameter to reflect newly inserted slice data; and

inserting new information identifying slices of the subset into a frame header of the output signal.

REMARKS:

Claim 16 has been canceled, and claims 11, 15, and 31 have been amended as discussed above, as authorized by Applicants' attorney, Ashok Mannava (45,301) on June 22, 2005.

REASONS for ALLOWANCE

1. Claims 11-15, 17-20, and 31 are allowed after entering the Examiner's Amendment as discussed in the EXAMINER'S AMENDMENT section.
2. Claims 21-30 are allowed as having the allowable subject matter as discussed in the last Office action as filed on 10/22/04.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
